

**UNAVIAcert**

# **Aerospace and Defense Quality Management Systems Certification**

# UNAVIAcert

**UNAVIAcert is a Certification Body that provides assessments and certification services, specialized in the Aerospace and Defense field.**

Born in 2002, **UNAVIAcert** is the first Italian Certification Body to be accredited against the **EN 9100** (Aerospace Quality Management Systems), **EN 9110** (Quality Management Systems - Requirements for Aviation Maintenance organizations) and **EN 9120** (Quality Management Systems - Requirements for Aviation, Space and Defense distributors and suppliers) standards.

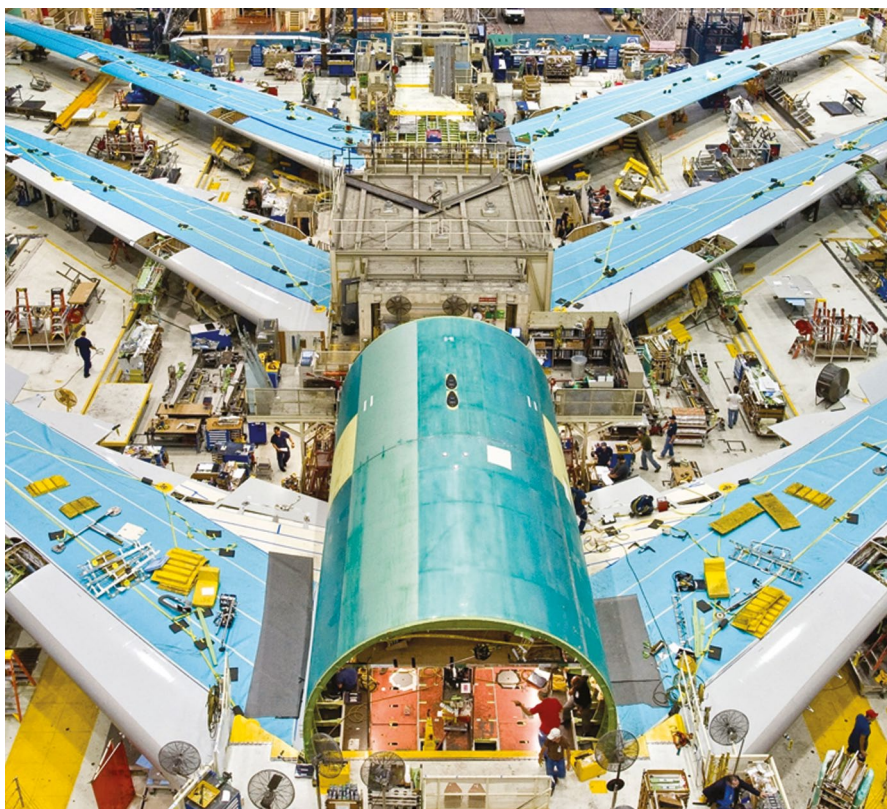

In December 2012 **UNAVIAcert** merged in **Kiwa**, a Leading Global Certification Company based in the Netherlands.

With the arrival of the major Shareholder, **UNAVIAcert** is able to offer many other services to support the organizations in national and international growth.

Our approach is based on the best industry practice, we have comprehensive specialist experience, in particular for safety and mission critical systems.

We have a large competence base to staff a project, which allows additional flexibility in the Audit execution. Our research specialists are available on a need basis.

Our **KIWA** corporate vision is to be a leader in providing services in high risk industries.

## Kiwa Group – Italy main services:

- Management Systems Certification
- Product Certification (CE mark, proprietary schemes)
- Personnel Certification
- Inspection
- Calibration of instruments and metrology
- Laboratory testing
- Training

# Aerospace and Defense Quality Management Systems Certification

**UNAVIAcert** is a solid and renowned company, first Italian Certification Body for the Aerospace Market, with all major OEM and related supply-chain certified against 9100-series standards.

**UNAVIAcert** offers more than a “ticket to trade” and takes a true partnership approach to certification. Partnering with us is a journey toward business improvement, and ultimately business excellence.

## **EN 9100 – Aerospace Quality Management Systems: Requirements for Development, Production, Installation and Service Organizations**

- 9100 series certifications show the needs of Aerospace Industry to use a Quality Management System directly controlled by the Industry itself, by mean of a Surveillance process (Oversight) on Accreditation Bodies (AB) and Certification Bodies (CB). Customers objectives are: cost reduction in Second Party Audits, expected improvements in design & manufacturing processes for the certified organizations, to give the best guarantee in product conformity to contractual requirements in terms of reliability, safety and airworthiness

## **EN 9110 – Quality Management Systems – Requirements for Aviation Maintenance organizations**

- 9110 Standard is dedicated to Organizations involved in the maintenance and overhaul Aerospace market. This Norm can be considered aside, in a complementary way (not as replacement) for a support Management System to National Authorities Regulations for Aerospace maintenance and overhaul (PART-145 Series)

## **EN 9120 - Requirements for Aviation, Space and Defence Distributors and Suppliers**

- 9120 Standard is for Organizations not involved in the Aerospace product realization, but only in distribution and logistics. Apparently simpler than the other two, actually it's of critical relevance for the Aerospace Industry, as it guarantees customer requirements during stocking and distribution of spare parts (as example during original manufacturer lots splitting) and in presence of counterfeit or suspected parts

## **Related Services - Testing & Calibration**

- Testing and checking of materials, processes and products
- Failure analysis
- Electrical safety and electromagnetic compatibility tests
- Calibration of measuring instruments
- On-site calibration

# Partner for Progress

UNAVIAcert is a Kiwa Italy Group company that provides evaluation and certification services, taking into account voluntary or binding standards, specialized in those related to the Aerospace and Defense field.

Kiwa is a globally active quality assurance firm that assists organisations across a broad range of market sectors with comprehensive certification procedures.

As your partner for progress, Kiwa will help you to continuously improve your processes, products, employees and organisations.
